
Efforts by one or more individuals to change the attitudes, beliefs, perceptions, or behaviors of one or more others

Social influence occurs when...
One person (the source) engages in some behavior (persuading, threatening, promising, or issuing orders),
That causes another person (the target) to behave differently from how he or she would otherwise behave.

Influence attempts
Influence attempts can be either open or covertly manipulative:
In open influence, the attempt is readily apparent to the target.
In manipulative influence, the attempt is hidden from
target.

Goals of social influence
Choosing correctly
Gaining social approval
Being consistent with commitments

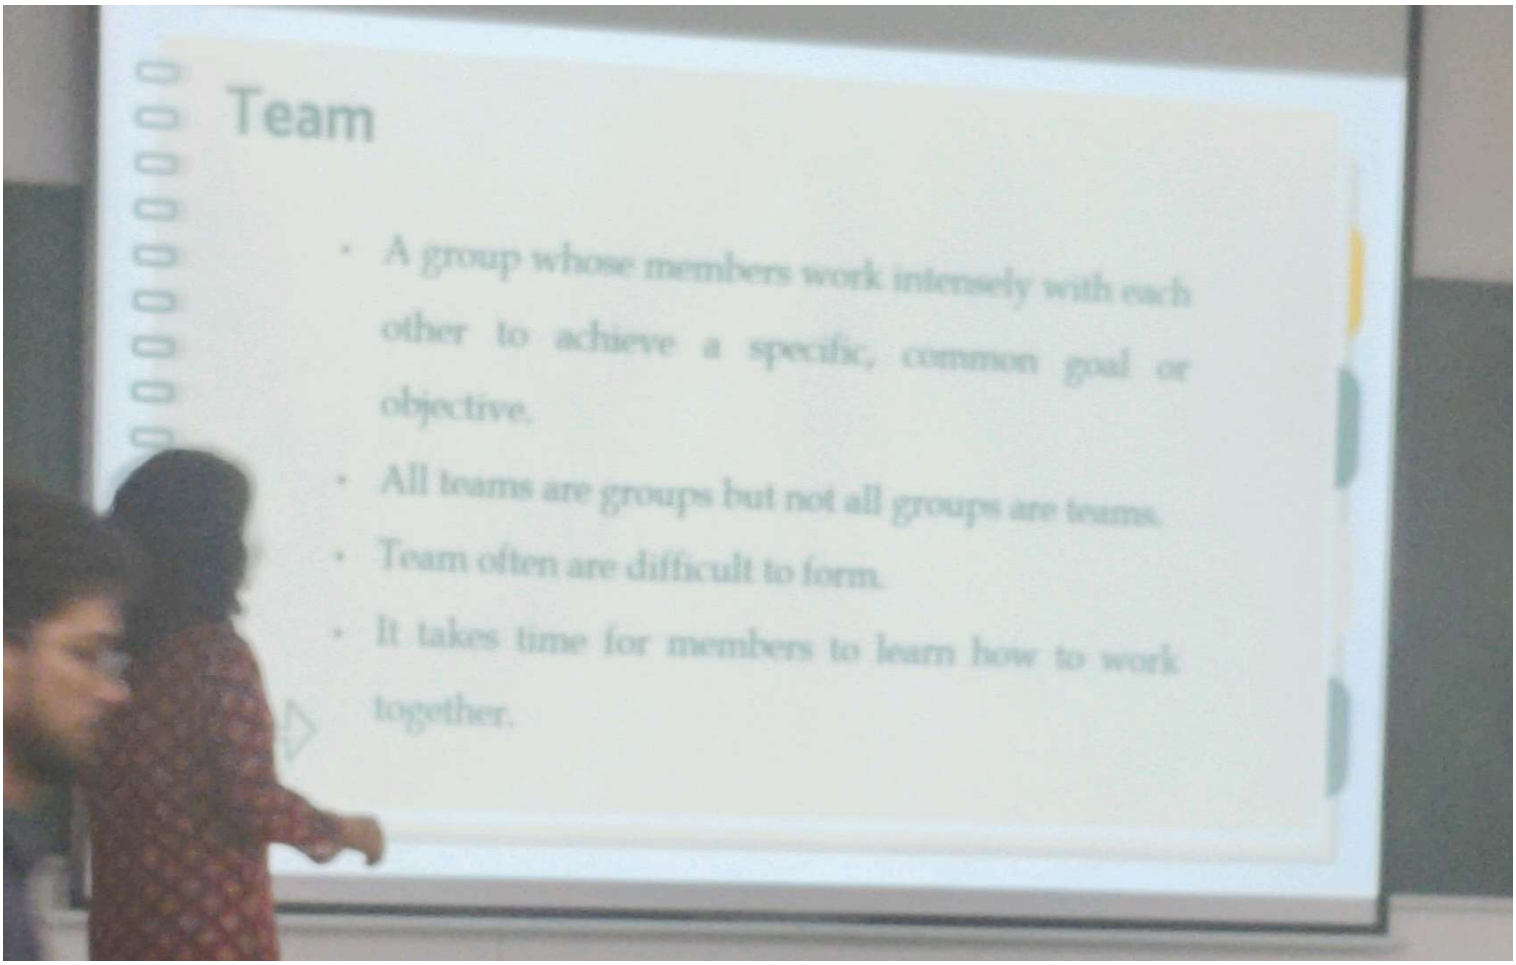

02
Group dynamics
Benefits, types and stages

Group

- Two or more people who interact with each other to accomplish certain goals or meet certain needs

- Two or more individuals who
  - share a set of norms, values or beliefs
  - Have certain role relationships
  - Experience interdependent behavior

- A social system in which members
  - Have regular contact
  - Act cooperatively
  - Share common goals

Team
A group whose members work intensely with each other to achieve a specific, common goal or objective.
All teams are groups but not all groups are teams.
Team often are difficult to form.
It takes time for members to learn how to work together.

Why do people join groups?

Reason	Perceived benefit
Security	Gaining strength in numbers; reducing the insecurity of standing alone
Status	Achieving some level of prestige from belonging to a particular group
Self-esteem	Enhancing one's feelings of self-worth, especially membership in a highly valued group

Reason	Perceived benefit
Affiliation	Satisfying one's social needs through social interaction
Power	Achieving something through a group action not possible individually; protecting group members from unreasonable demands of others
Goal achievement	Providing an opportunity to accomplish a particular task when it takes more than one person's talents, knowledge, or power to complete the job

Importance of groups for organizations

Synergy — The creation of a whole that is greater than the sum of its parts

Superior performance when

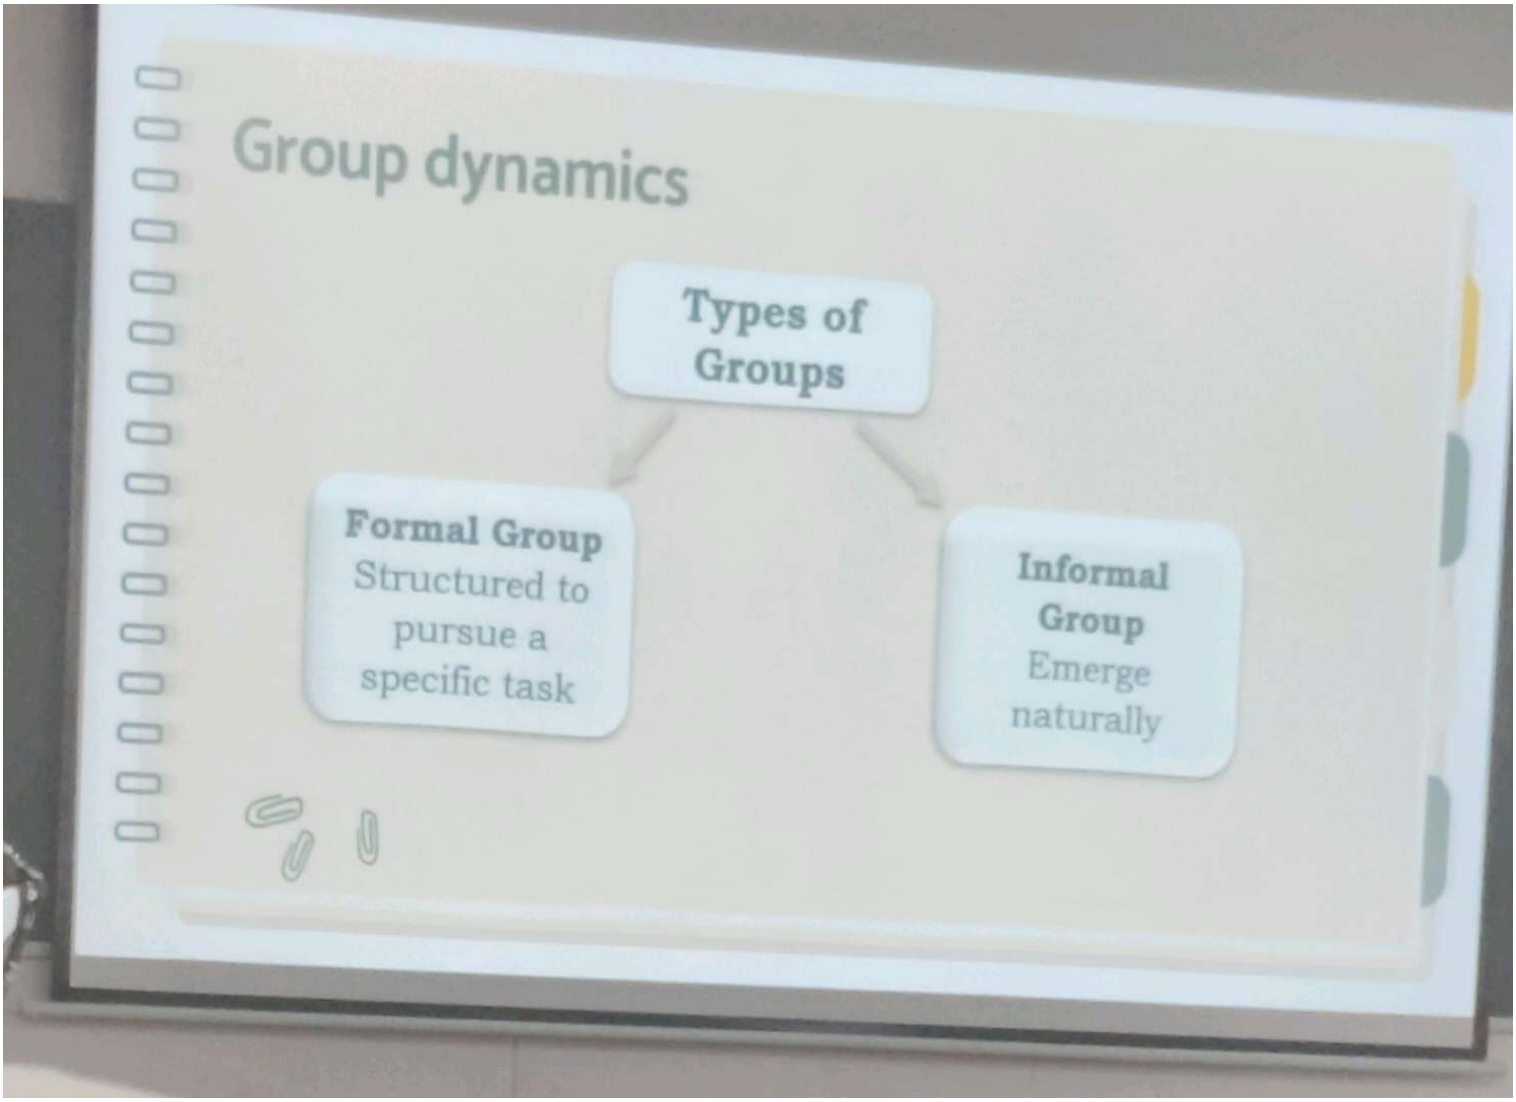

- Problem-solving can be handled by dividing work and sharing information
- Need for creativity and innovation (groups more willing to take risks than are individuals)

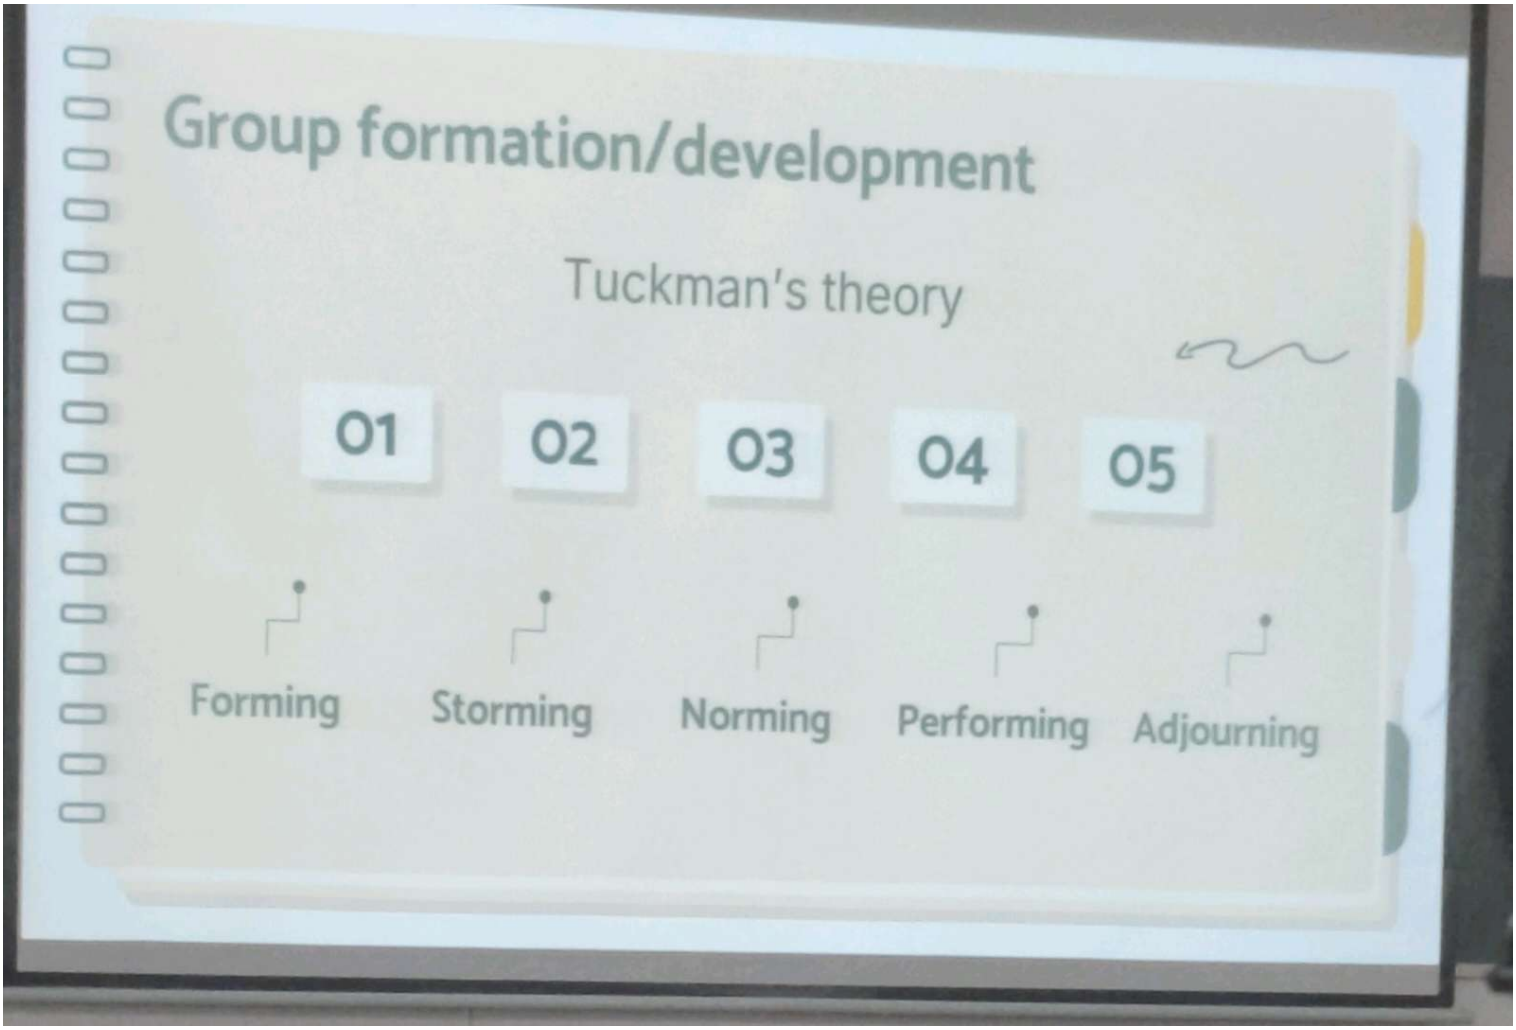

Learn — Forum to learn and share information

Group dynamics

Social process by which people interact and behaviour in a group environment

Involves the influence of personality, power, and behavior on the group process

Group dynamics
Types of Groups
Formal Group
Structured to pursue a specific task
Informal Group
Emerge naturally

Group formation/development
Tuckman's theory

Forming
Storming
Norming
Performing
Adjourning

Stage	Description
Forming	• Major goals of the group have not established. • The nature of task or leadership of the group has not been determined
Storming	• Group is likely to see the highest level of disagreement and conflict in this stage • Members often challenge group goals and struggle for power

Stage	Description
Norming	• Characterized by the recognition of individual differences and shared expectations • Group members hopefully begin to develop a feeling of group cohesion and identity
Performing	• Occurs when the group has matured and attains a feeling of cohesiveness • Individuals accept one another and conflict is resolved through group discussion
Adjourning	• Disbandment; not all groups experience this stage

STAGES OF GROUP FORMATION

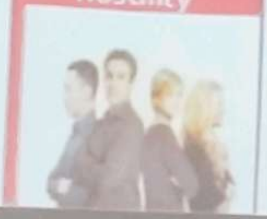

Stage I Forming

Members get to know each other & set ground rules

Stage II Storming

Members come to Resist Control by group Leaders & Show hostility

Stage III Norming

Members Work Together developing Close Relationships & feelings of Cohesiveness

Stage IV Performing

Group members work towards Getting their jobs done

Stage V Adjourning

Group may disband either after meeting their goals or because members Leave

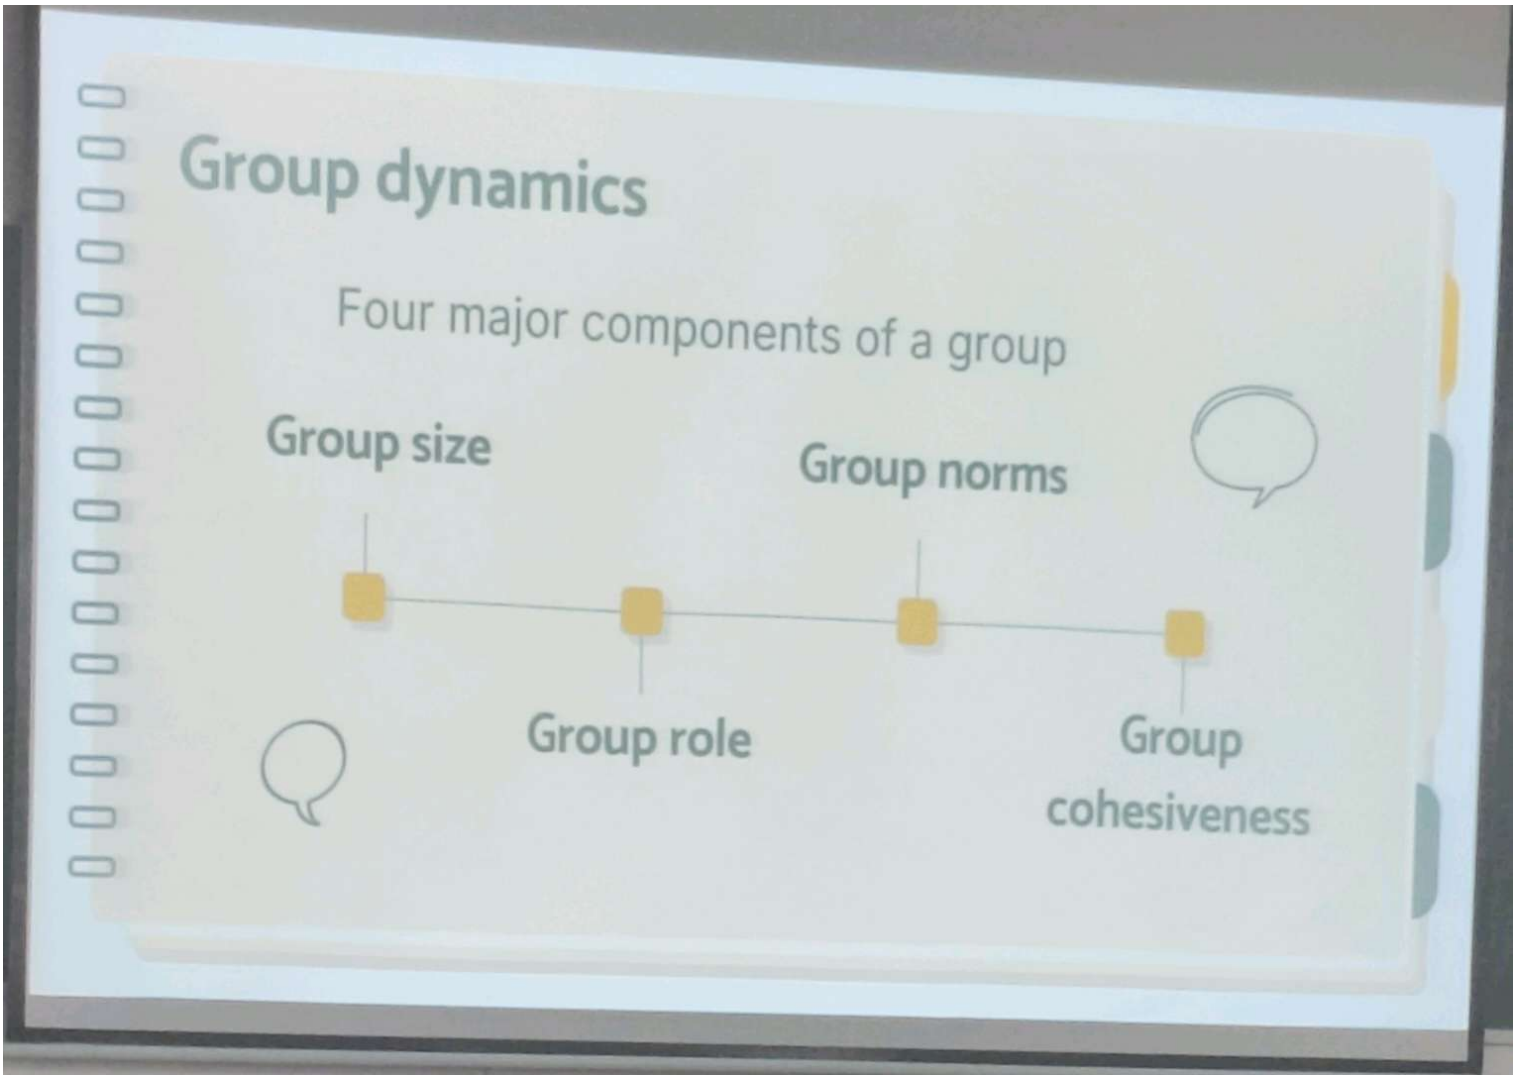

Group dynamics

Effective group performance depends on the size and composition of the group

Individual skills and performance must be a consideration in forming a group

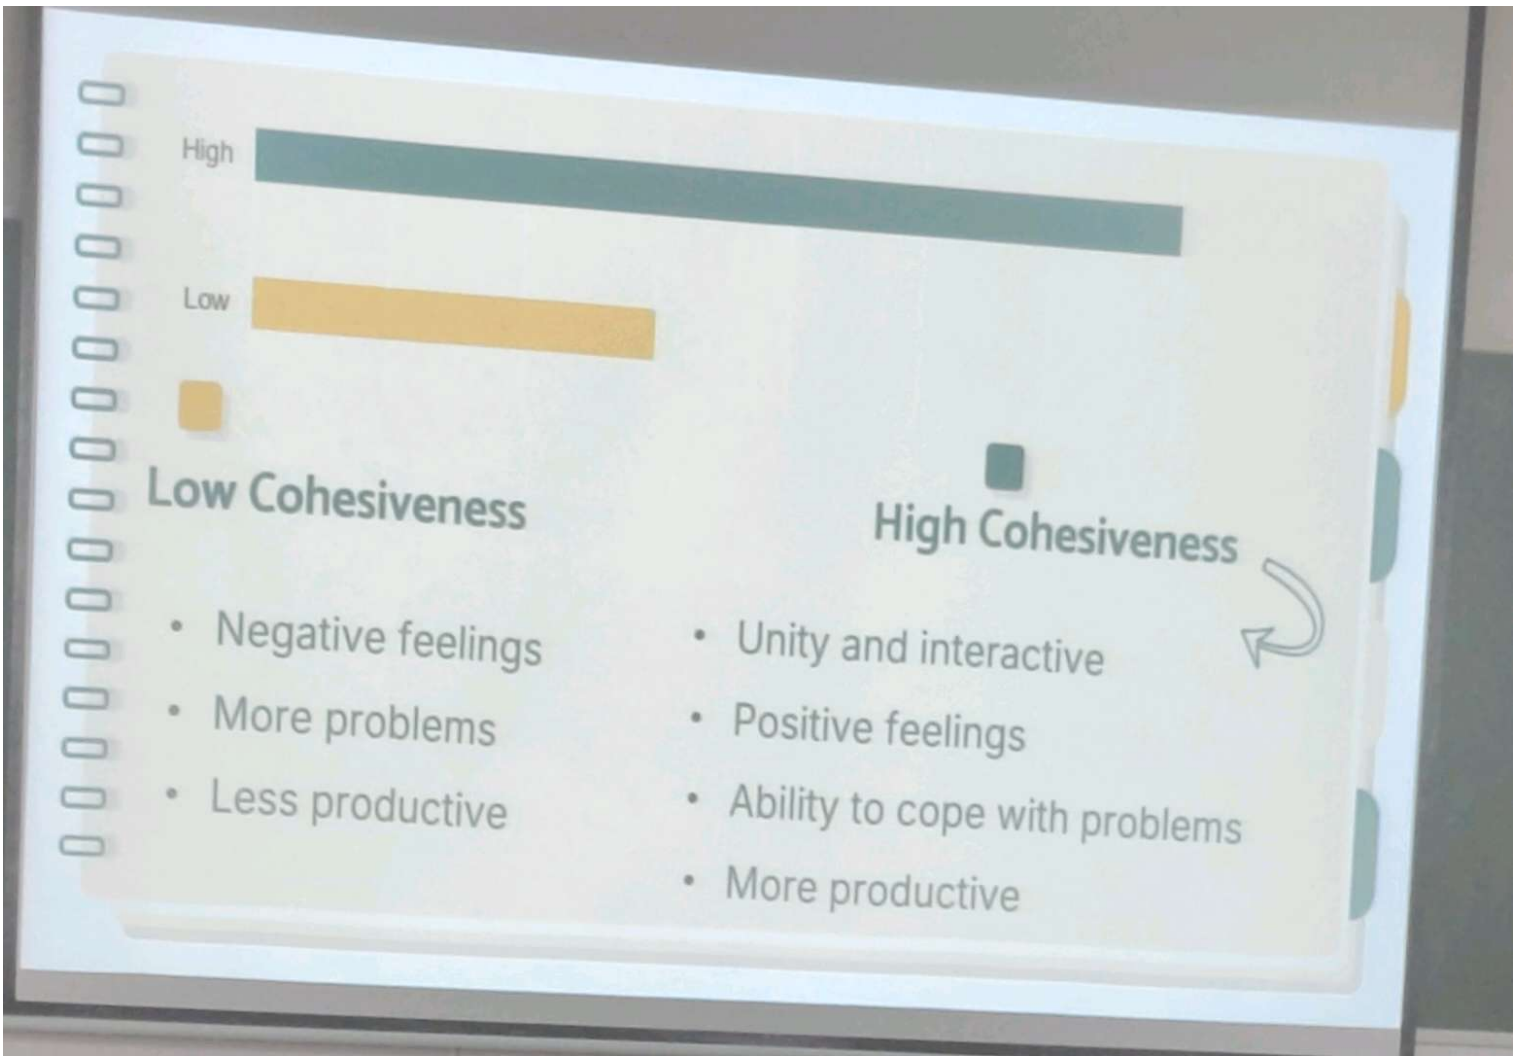

Diversification is a factor in both group development and skill requirement

Group dynamics
Four major components of a group
Group size
Group norms
Group role
Group cohesiveness

Group size

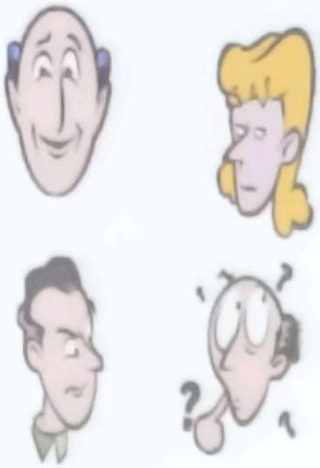

- Group size differ with respect to the type of group
- Large groups are good for gaining diverse perspective but they effect the individual performance
- Benefits and problems with large groups: Social facilitation vs. social loafing

High
Low
Low Cohesiveness
• Negative feelings
• More problems
• Less productive
High Cohesiveness
• Unity and interactive
• Positive feelings
• Ability to cope with problems
• More productive

Who won, and why?

Did your group act like this...

... Or like this?

Groups with high cohesiveness get better results!

Presence of others

- Scientific study of how a **person's behavior, thoughts, and feelings** are influenced by the **real, imagined or implied presence of others**
- The presence of others sometimes enhances and sometimes impairs an individual's performance
