Time taken	8 mins 59 secs
Grade	**11.00** out of 15.00 (**73**%)

Question **1**

Complete

Mark 1.00 out of 1.00

Number of stages/phases in Rapid Application Development Model (RAD):

a. 8
b. 6
c. 7
d. 5
e. 4

The correct answer is: 5

Question **2**

Complete

Mark 1.00 out of 1.00

Which one of the following models is not suitable for accommodating any change?

a. RAD Model
b. Build & Fix Model
c. Waterfall Model
d. Prototyping Model

The correct answer is: Waterfall Model

Question **3**

Complete

Mark 1.00 out of 1.00

What we cannot predict using Function Point Analysis?

- a. Both Bugs in code and Divide by Zero error
- b. Cost and Efforts
- c. Divide by Zero error
- d. Bugs in code

The correct answer is: Both Bugs in code and Divide by Zero error

Question **4**

Complete

Mark 0.00 out of 1.00

When the software is deployed and we find a need of testing then we go for:

- a. Regression Testing
- b. Waterfall Modelling
- c. Deployment
- d. Prototype Modelling

The correct answer is: Regression Testing

Question **5**

Complete

Mark 1.00 out of 1.00

The spiral model introduces:

- a. development based on quadrants
- b. development based on validation only
- c. development based on verification only
- d. development without risk assessment

The correct answer is: development based on quadrants

Question **6**

Complete

Mark 1.00 out of 1.00

Which two of the following models will not be able to give the desired outcome if user's participation is not involved?

- a. RAD & Prototyping
- b. RAD & Spiral
- c. RAD & Waterfall
- d. Waterfall & Spiral

The correct answer is: RAD & Prototyping

Question **7**

Complete

Mark 1.00 out of 1.00

Selection of particular life cycle model is based on,

- a. Requirements
- b. Users
- c. All of the above
- d. Project types and associated risks
- e. Technical knowledge of development team

The correct answer is: All of the above

Question **8**

Complete

Mark 1.00 out of 1.00

Selecting a SDLC depends on:

- a. All mentioned
- b. Stakeholder's input
- c. Developer's inputs
- d. Client's requirements
- e. Requirements specified

The correct answer is: All mentioned

Question **9**

Complete

Mark 1.00 out of 1.00

Which stage is not there in Software Development Life Cycle:

a. Deployment
b. Both Abstraction and Deployment
c. Abstraction
d. Testing

The correct answer is: Abstraction

Question **10**

Complete

Mark 0.00 out of 1.00

How is Incremental Model different from Spiral Model?

a. Progress can be measured for Incremental Model.
b. Changing requirements can be accommodated in Incremental Model.
c. no difference between these two
d. Users can see the system early in Incremental Model.

The correct answer is: Progress can be measured for Incremental Model.

Question **11**

Complete

Mark 1.00 out of 1.00

The spiral model was originally proposed by

a. IBM
b. Royce
c. Barry Boehm
d. Pressman
e. Albrecht

The correct answer is: Barry Boehm

Question **12**

Complete

Mark 1.00 out of 1.00

Which of the following model put much more emphasis on testing?

- a. Waterfall model
- b. Rapid action development model
- c. V-V model
- d. Agile model

The correct answer is: V-V model

Question **13**

Complete

Mark 0.00 out of 1.00

If each and every line of an SRS is unique then the SRS is said to be:

- a. Inconsistent
- b. Unambiguous
- c. Unverified
- d. All the mentioned

The correct answer is: Unambiguous

Question **14**

Complete

Mark 0.00 out of 1.00

Software Project Management deals with the following activities:

- a. Project Planning and Project Estimation and Project execution
- b. Both Project Planning and Project Estimation
- c. Both Project Estimation and Project Execution
- d. Project Execution
- e. Project Estimation
- f. Project Planning

The correct answer is: Project Planning and Project Estimation and Project execution

Question **15**

Complete

Mark 1.00 out of 1.00

Select the correct statement:

- a. Only BPM supports developers
- b. Only BRMS supports developers
- c. BPM and BRMS doesn't help testers and developers
- d. BPM and BRMS supports developers and testers
- e. Only BRMS supports testers
- f. Only BPM supports testers

The correct answer is: BPM and BRMS supports developers and testers
